

REA-100

Display Terminal with Text & Text to Voice

REA-100 is compact 4 Line large LCD alerting terminal both with Text and Text to Voice facility. When a Message is received it is indicated by a high audible alert, flashing LED and flashing backlight. After the audible alert sound the REA-100 speaks the text that is on the screen. If required REA-100 can be programmed to indicate the messages without the full audible and visual alerting

REA-100 is supplied with drivers to deliver text information to electronic message boards at the same time that it delivers the audible alerts. The optional display board connected to REA-100 via RJ-12 serial port

REA-100 can be used either with battery or AC wall adaptor. The unit operates approximately one year when used with batteries. The innovative design allows the unit free stand on any desk or shelf surface. REA-100 is also suitable for wall mounting and vehicle installation with optional vehicle mounting kit

In non alert mode REA-100 displays Date & Time as a clock
